

Victoria Hospital
FOUNDATION
HEALTHIER FUTURES

Victoria Munro is a Professional Engineer and Project Director at Bockstael Construction. Victoria received her Bachelor of Science in Biosystems Engineering, with Environmental Specialization from the University of Manitoba in 2015 and has also served on the Board of Directors for Sustainable Building Manitoba.

Victoria was born and raised in the south end of Winnipeg, and is currently raising her family in the same area she grew up in. Victoria Hospital has been the healthcare facility that has served her family for decades, from grandparents, to parents and now her own family. Her family connection and time spent at the hospital over the years was her inspiration for wanting to become involved in the Foundation. Victoria officially joined the Victoria Hospital Foundation Board of Directors in 2019 and serves on the Development committee and Grants & Impact Review committee.

GIVE. INVEST. CHANGE LIVES.
